MOCK-UPS

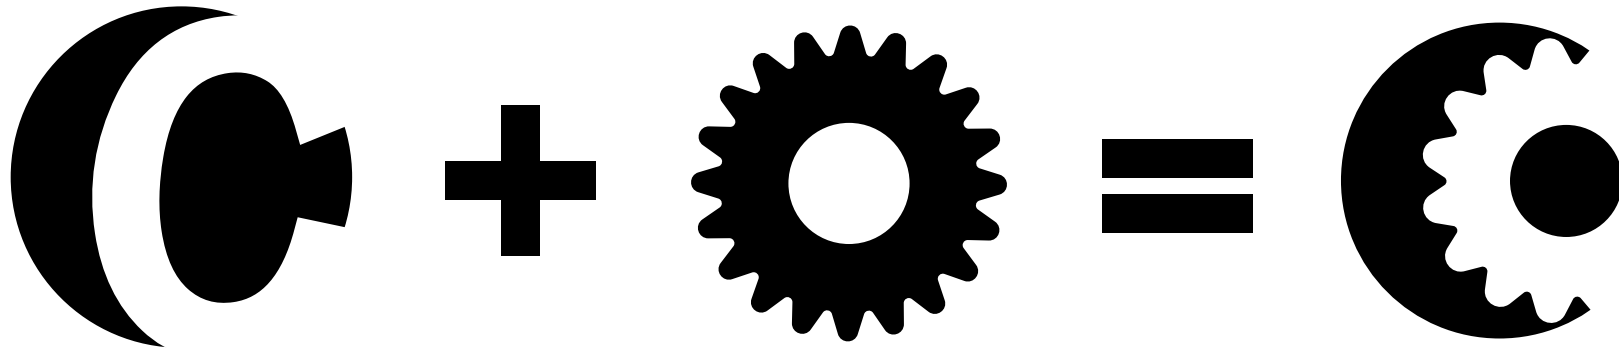

Encouraging drivers to stop, check, and make safer
choices before they drive.

Buying a used car shouldn't mean compromising on safety. By understanding key safety features and vehicle history, drivers can make smarter choices — reducing risks, saving lives, and helping create safer roads for everyone.

LOGO DESIGN

CONCEPT

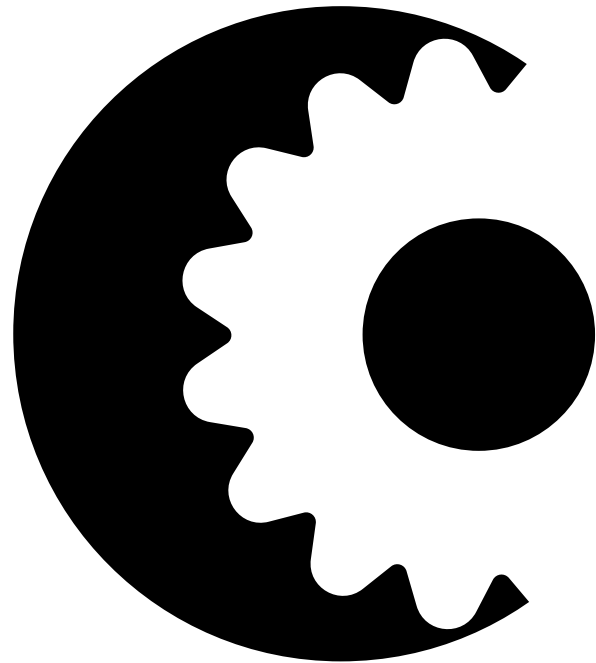

I wish to emphasize the word CHECK. I attempted to present the letter C using the contrast between black and white, positive and negative.

Some of the risks associated with used cars stem from mechanical issues. This reminds me of gears.

I arrived at this logo by combining the two concepts. The dual meaning of “CHECK” and “inspecting machinery” is expressed through a single phrase.

TYPOGRAPHY

FRANKLIN GOTHIC DEMI COND

It's a bold sans-serif font. With its compact letterforms and high legibility, I employed it for headlines and various typography projects.

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890

STOP. CHECK. DRIVE.

FRANKLIN GOTHIC BOOK

It is a medium-weight sans-serif font with high legibility. It is ideal for extensive text content such as body copy.

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890

STOP. CHECK. DRIVE.

FRANKLIN GOTHIC HEAVY

It is the boldest weight in Franklin Gothic. Yet it remains highly legible, which is why I incorporated it into the logo design.

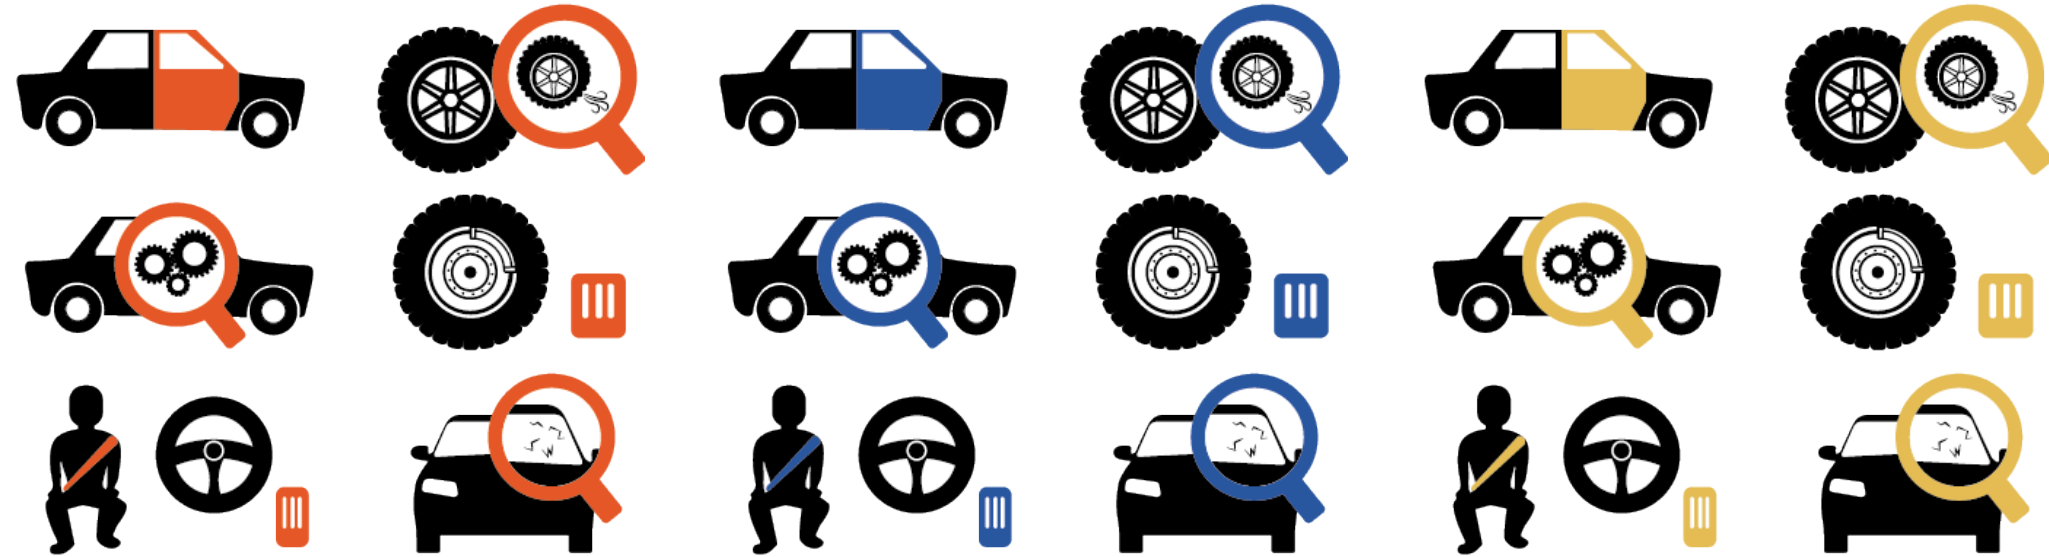

ICONS and SECONDARY IMAGERY

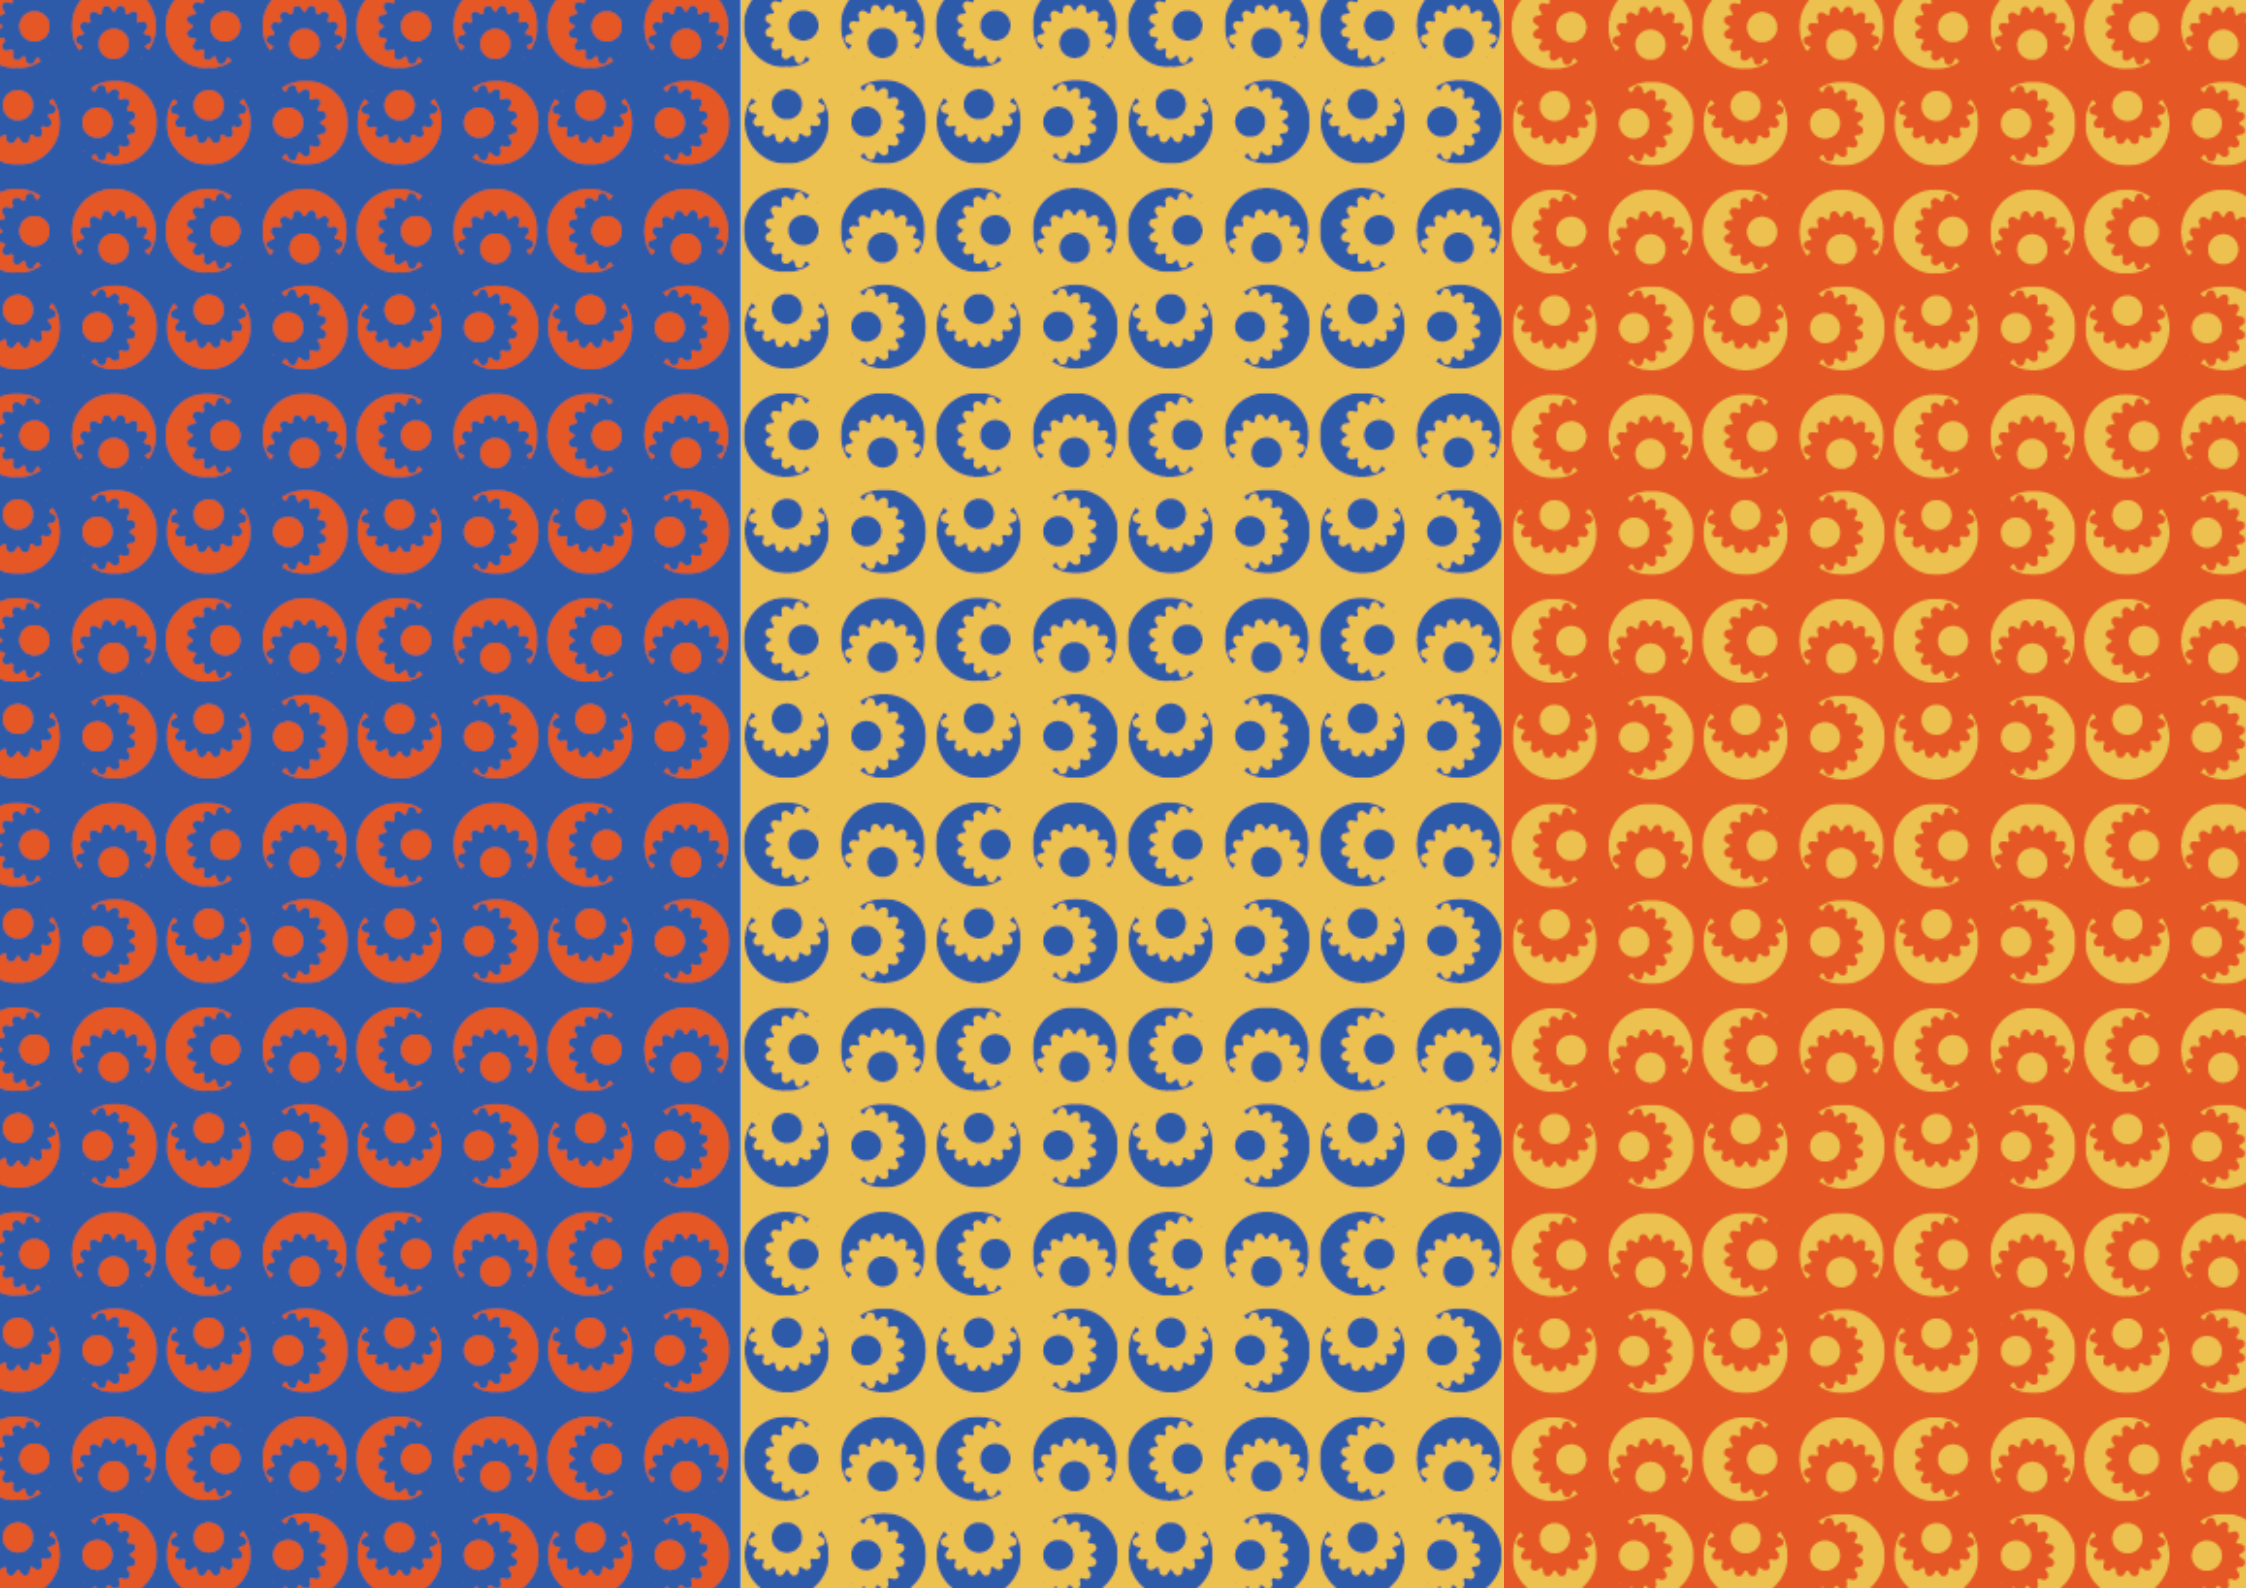

ICON

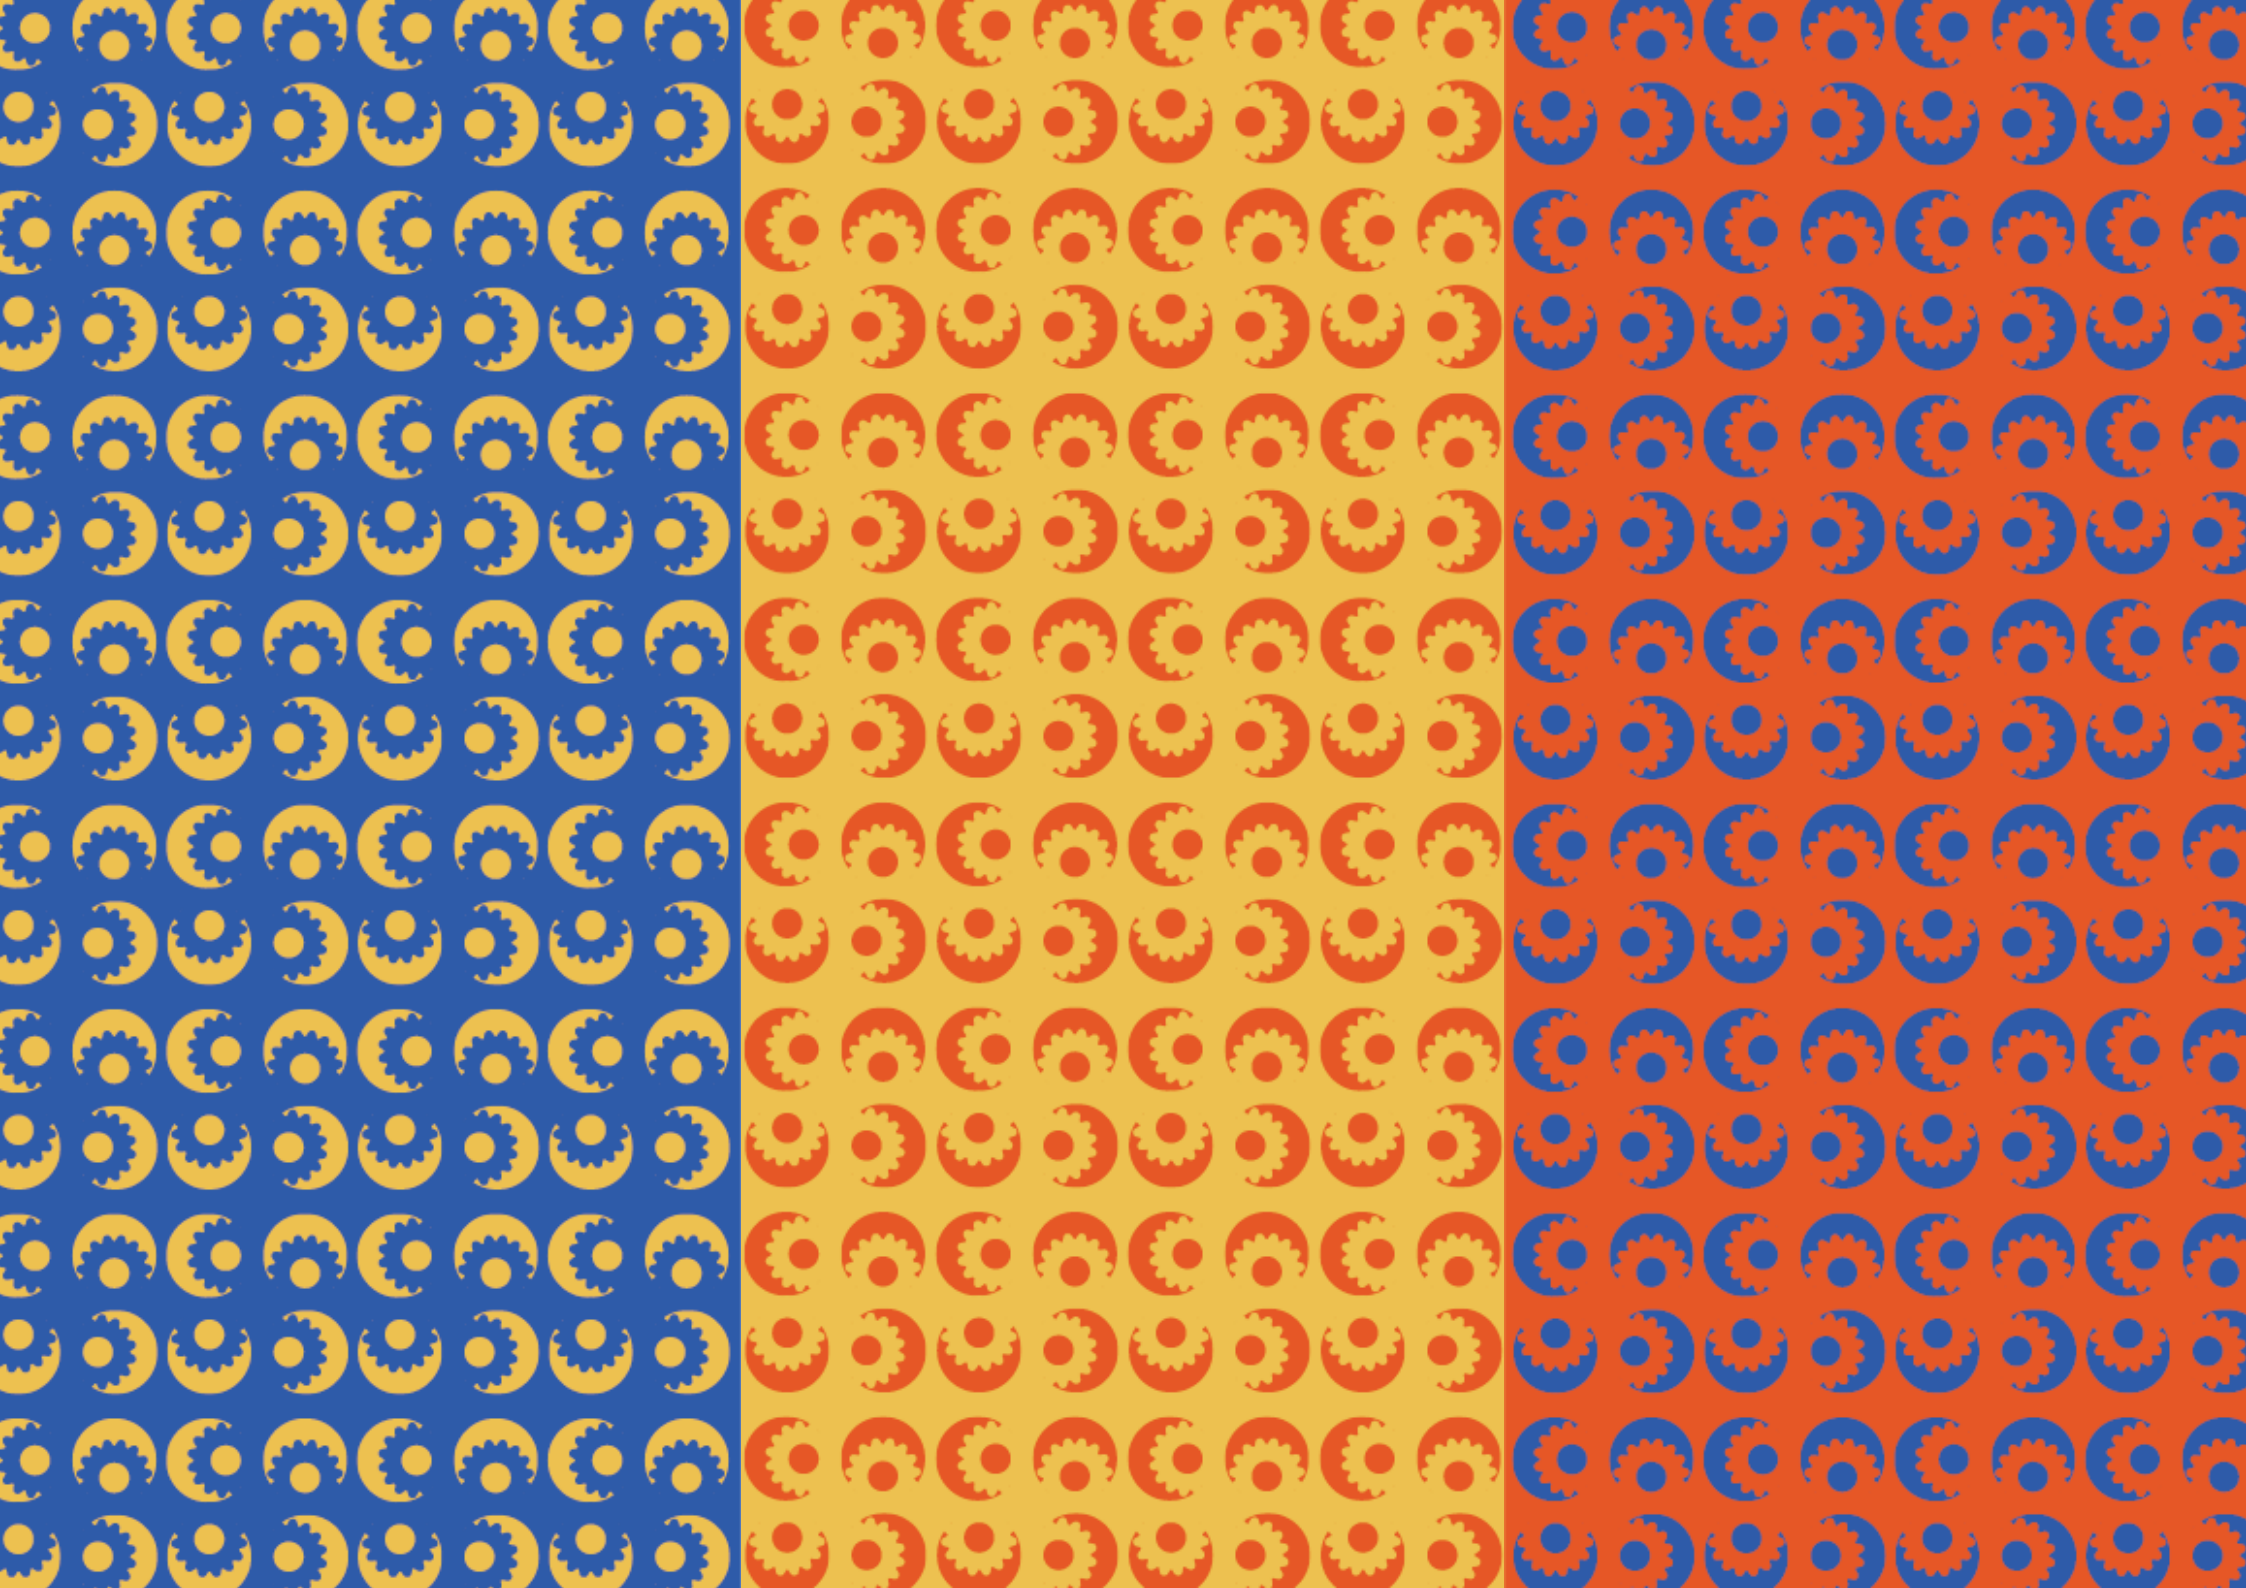

The design of the icons consists of simple geometric shapes. I aim for users to intuitively grasp the safety information they need to be aware of when purchasing used vehicles through these icons.
